

KYLA ALLEN

Software Developer

The purpose of a problem is not to find a solution, rather it is to experience the solution. What's the point of a problem if you don't learn from it? Coding values the small failures, because if those small failures were blocks, you could make yourself a staircase out of them to reach the solution.

Technical Skills

Java - JavaScript - CSS - HTML -
jQuery - Bootstrap - Spring

Exposure to: MySQL - GitHub - C++ - C#

Education

September 2018 - February 2019

Codeup

Codeup is a fully-immersive, project-based, and intensive 18 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.

August 2017 - June 2018

Palo Alto College

Major: Computer Science
GPA: 4.0

Development Projects

Weather Map - October 2018

An API-based application using HERE Maps. Allows users to select a location and view the weather in said location.

Movies Application - November 2018

Allowed users to update, add, and delete movies that are presented through a Bootstrap carousel.

Contacts Manager - November 2018

A control-line application made with Java. Allows users to search for, add, and remove contacts.

Adlister - January 2019

An application that uses Java, JSPs and MySQL to allow users to create, delete, modify, and view ads.

Pettential- February 2019

A website that allows adopters and shelters to view pets and programs available in their area.

Professional Experience

August 2018-September 2018

Allen Tharp

Food Service Worker. Was in charge of serving food and cleaning the area. Resigned in order to continue my education.

While my professional experience is limited, it allowed me to develop a clearer head under pressure and to build stronger work ethic.
