

CARLO MUNGUIA

SOFTWARE DEVELOPER

PROFESSIONAL SUMMARY

Software development tends to be associated with academia, computer science, "technicality" in society. What we are really doing is communicating on many levels. Whether it's with a programming language, a server, perhaps a client flying in for an important meeting - we are in communication. With a strong background in industrial sales & building materials, I understand what it takes to implement communication into beautiful, functional software systems. Let's build a new world together!

SKILLS

HTML	Java EE
CSS	Git
JavaScript	Spring
Bootstrap	Spring Boot
Vue.JS	Node.JS
Ruby	T.D.D.
MySQL	Pair-Programming

Exposure To:

Go	Rust
Elm	Ember.JS
Sass	Elixir/Phoenix
Rails	Swift
GraphQL	Typescript
React	Tailwind CSS

WORK HISTORY

DEER PARK LUMBER

INDUSTRIAL SALES

2015 - 2017

As the main point of contact for all industrial sales, I was responsible for handling all industrial accounts & procurement logistics per project need. Worked hand in hand with all vendors, shipping teams & procurement coordinators to ensure materials were delivered & within scope of specified project.

LOWE'S

COMMERCIAL SALES

2013-2015

Oversaw the Pro Sales desk to work exclusively with Commercial & Industrial clients within our location area & beyond. Coordinated with various districts nation-wide to implement sales systems per customer need. Increased sales by 8% fiscal year 2014.

S.A. LIMITED

MANAGER

2011-2013

Managed an entire specialist retail store front from top to bottom. From inventory, hiring to terminating, scheduling, vendor coordination, social media presence etc. - if there was any aspect of the company that needed handled, I was involved in some way & implemented it successfully.

DEVELOPMENT PROJECTS

OBLIQ

JAVA EE & SPRING

JUNE 2019

A full stack web application utilizing Java & the Spring Boot framework. This application helps people communicate their problems in an organic, intuitive way.

CONTACTS MANAGER

JAVA EE

APRIL 2019

A TUI interface application utilizing Java EE. A searchable, customizable contacts manager that prompts the user for various data choices via navigation.

ITUNIFY

VUE.JS & VUETIFY

MARCH 2019

A useful SPA application built with the Vue.JS framework, the Vuetify UI component kit & utilizing the Apple iTunes API. Find your favorite artist, albums, release years etc with a simple search form that auto-displays using a simple grid image system.

MOONRISE KINGDOM'S WEATHER MAP

JAVASCRIPT

FEBRUARY 2019

Created with HTML, CSS, Javascript and utilizing the Mapbox API, our team built a useful Weather Map application that auto-populates the weather forecast for the upcoming week ahead.

ACADEMIC BACKGROUND

CODEUP

CERTIFICATE OF COMPLETION, JAVA FULL-STACK DEVELOPMENT

JUNE 2019

Fully-immersive, project-based, and intensive 18 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.
