Responsible for the successful operation of data processing and computer system operations on server and client machines.

## DEVELOPMENT PROJECTS

### Bexar Air Application - CivTech Challenge 5/2019

Bexar Air compares air quality data with pediatric asthma hospitalization rates by spatial and temporal analysis in Bexar County. Users can create a profile and track air quality of personal locations. Additionally, users can opt to receive text alerts to notify them when their custom places reach an unhealthy air quality level.

### Adlister Blog Application 4/2019

Java application utilizing servlets and JavaBeans where users may functionally create an account/profile and post categorized ads.

### Contacts Manager 3/2019

Java-based program running through the terminal, this partner project utilizes HashMap programming to view, add, and remove contacts

### Movies Database 3/2019

Single page interactive movie application utilizing Node.js to dynamically update html using AJAX requests

### Coffee Project 2/2019

JavaScript program with search functionality and the ability to "add a roast."

## ACADEMIC BACKGROUND

### Codeup - Certificate of Completion 6/2019

A fully-immersive, project-based, and intensive 18 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.
