### SKILLS

HTML	Java SE
CSS	MySQL
JavaScript Framework	Spring Boot
BootStrap	jQuery
VCS with GIT	Object Oriented Programming
Thymeleaf	Java EE (Servlets, JSP)
	Paired Programming
Exposure to:	Skeleton Framework
React	TDD

### EMPLOYMENT HISTORY

#### Black Book Sound 2015-2019

Music Producer/Sound Engineer

Completed audio projects for TV, movies, artists, and marketing purposes. Focusing on local artists to be branded and produced on a professional level while working alongside some bigger studios/managers on high level artist EPK's.

#### Gamestop 2011-2012

Assistant Store Manager

Hired on as a seasonal and achieved ASM within 3 months. Led the district in pre-sales for all products sold within the store. Kept inventory of all products as well as kept a track of all store income weekly in order to bring an accurate amount to weekly meetings with the District Manager.

### MILITARY BACKGROUND

#### United States Army (Top Security Clearance obtained in 2012)

Infantry Team Leader 2012-2014

Supervised and led a team of heavy weapons specialists, educating and applying hands-on training for them to succeed in the team's operations and tasks. Volunteered to complete the CROW Course to expand my knowledge and training as an Infantryman and placed in the top 10% of my class. Was responsible for maintaining and tracking over 9 million dollars worth of equipment. Discharged Honorably in Oct 2014 with multiple Army Achievement Awards.

### DEVELOPMENT PROJECTS

#### QuickScrim JUL 2019

Utilizing Spring Boot and Thymeleaf, QuickScrim is a sports application that allows users to quickly search events nearby as well as create their own for other users to be able to join. Also have a forum with categories to all sports where users can post questions or general information based on that category.

#### Adlister JUN 2019

Team project built over a week utilizing Java servlets, JSP's, JSTL, and a MySQL database. Application is a Craigslist "clone" that is capable of performing basic CRUD functionality utilizing a live database.

#### Weather Map APR 2019

Using the DarkSky API, I created a 3 day weather forecast starting at the current day and showing various information such as high and low temperature, humidity weather conditions. Also added a feature to type a latitude and longitude that when submitted, shows the forecast for that location as well as a pin on the map to drag to your desired location to check the weather.

#### Coffee Project APR 2019

Using JavaScript. My partner and I created a coffee shop page displaying a list of coffees which could be filtered to only show the selected ones by using drop down menus to cater to your selection. If a coffee was clicked a popup would show with the name, origin, and a brief description of the taste as well as a map starting in San Antonio, that would fly you to the location of where the coffee came from. If you wanted to add your own coffee you could fill out a form that would add it to the coffee list. Added options to add the origin, a picture, and description and when you clicked on your coffee, all the descriptions you gave would be in the popup.

### ACADEMIC PROFILE

#### Codeup JUL 2019

Obtained my Certificate of Completion by finishing the fully-immersive, project-based, and intensive 18 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.

#### Wharton County Jr. College JUL 2015

Obtained my Assoc. in Criminal Justice. Learned how to assume administrative responsibility, work within a crime scene and interview suspects. As a graduate of the Criminal Justice degree program, I gained skills in law enforcement, corrections and public safety.
