## DEVELOPMENT PROJECTS

**Data2Doohickey**   **07/2019**

Our capstone is a 3D model rendering application which allows users to upload, view, and download STL files. My contributions include front-end styling of all the pages and model rendering. Using HTML, CSS, JavaScript, Spring, and Thymeleaf.

**Adlister**   **06/2019**

The adlister was an application that allowed user to place items for sale, while allowing others to contact the seller to make transactions. My contributions included creating the update and delete functions in Java, implementing user ads onto their profile, intended redirects, and front end styling.

**Movie Application**   **05/2019**

For the movie application I helped my team build a site that let users input movies data. My contribution included JavaScript, & CSS.

**Weather Map**   **04/2019**

For the weather map I created an application that gets weather information based on latitude and longitude coordinate. My contribution included the Mapbox API, JavaScript, HTML, & CSS.

**Disco Snake**   **04/2019**

In this project my team and I created a copy of the original 1997 game of Snake, but flashes in a randomized color combination while playing music by the Bee Gees in the background. My contribution included JavaScript, & CSS.

## EDUCATION

**Full-Stack Web Development**   **07/2019**
