

SAMUEL CHRISTIAN MOORE

SOFTWARE
DEVELOPER

/ ABOUT ME

As a software developer, I believe it's important to continue learning and keep up with new technologies being introduced to the industry. By teaching junior software developers currently enrolled at Codeup, I've been able to expand my knowledge and reaffirm my existing skills through different scenarios. Every day is a new challenge to find creative, innovative solutions when collaborating with students on their projects. I wish to contribute my growing knowledge of software development to a great team and become a valuable asset to a company.

| Git | React TS |
| Java SE | Styled-Components |
| Java EE | OOP |
| MySQL | Prisma |
| SpringBoot | TypeScript |
| JQuery | MVC |
| React Hooks | MongoDB |

/ PROFESSIONAL EXPERIENCE

>> Graduate Fellow

Codeup | 2019 to Present

Assist instructors with classroom management while helping placement team build Mockprep for student success during mock interviews. Additionally helping students with any questions regarding exercises and projects during or before class hours.

>> CNA

Hilltop Nursing Home | 2018 - 2019

Assisted the elderly with daily basic and medical needs such as dressing wounds, physical therapy, and help upper management with additional tasks.

/ DEVELOPMENT PROJECTS

>> TOP Training (SpringBoot)

An application built to help law enforcement personnel track their certifications in a user-friendly way. The site allows a user to view and apply for courses and see progress in enrolled classes to earn a certificate-of-completion at the end of a course.

>> MockPrep (SpringBoot)

A deployed application built along with Codeup's placement team. The app is a place where Codeup students can find common interview questions, resources for those questions, as well as possible solutions to questions.

>> MockPrep (React)

An application built off of the idea of the MockPrep with SpringBoot project but now built in React as a single page app that adds additional flash card collections and quizzes that will implement spaced repetition to help solidify declarative knowledge.

/ EDUCATION HISTORY

>> Codeup

Full-Stack Software Developer | Graduated July 2019

A fully-immersive, project-based, and intensive 18 week full-stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.
