EMPLOYMENT HISTORY

Pet Stylist PetSmart | 2015/2019

Administrative duties included managing appointments and scheduling, guiding customers towards the proper cut and services to fit their individual needs

Used critical thinking to be able to work with animals that are unpredictable and determine the best course of action to create a successful groom.

Mastered the ability to perform quality, detail specific breed cuts quickly and efficiently.

ACADEMIC PROFILE

Codeup 12/2019 **Certificate of Completion**

A fully-immersive, project-based, and intensive 20 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.

PROJECTS

AdLister 10/2019

A paired-programming java application that allows the user to create, edit, and delete ads. Used JSP files, servlets DAOs, Maven, MySQL, and Bootstrap for styling. Contributed the delete and edit buttons, allowing the users to edit and entirely remove their adds as they wish.

Movies Application 9/2019

A paired-programming project where users can delete, edit, and add movies. Contributed with some of the JavaScript code but mostly focused on design and layout. Made using JavaScript, npm, custom CSS, and Bootstrap.

Weather Map 8/2019

A solo project showing a 3-day weather forecast for the users chosen location as well as a map to change the location. This project utilizes the Dark sky API and Mapbox API to show weather forecast for the selected location. Made using JavaScript, custom CSS, and Bootstrap.

Codeup Webpage Design 7/2019

A paired-programming project using CSS grid and Media Queries to create a responsive page that changes design on large, medium, small, and extra small screens.
