

# JASON KEMPEL

## SOFTWARE DEVELOPER

I hold myself accountable with any task that is thrown my way and ensure that I am 100% satisfied with my work before submitting. My character has always been forefront in everything I do. I pride myself on being professional and honest with anyone I interact with. I have always been fascinated with how things work, this program has fulfilled that fascination and then some. I'm excited to start applying what I have learned so far and building off that knowledge, while contributing to better a team.

### SKILLS

HTML	Java SE
CSS	MySQL
JavaScript	Spring Boot
Framework	Paired Programming
Bootstrap	jQuery
VCS with Git	Object Oriented
Thymeleaf	Programming
Java EE (Servlets, JSP)	
Test Driven Development	

### WORK EXPERIENCE

#### USAA

**Member Service Associate** 04/18 - 04/19

Provided solutions that met the member's needs and facilitated the member's financial security. Identified member events to provide solutions on products and closed on product sales that met the member's needs.

### MILITARY EXPERIENCE

**United States Air Force** 05/06 - 05/18  
**Security Clearance** exp. 2027

Served in a manager capacity with records custodian experience, responsible for performing administrative actions pertinent to registering/issuing passes & badges to personnel for restricted areas. Conducted in-depth criminal background checks on base visitors i.e. contractors, non-DoD personnel, etc. Supervised, trained, and evaluated a 5-member team.

### DEVELOPEMENT PROJECTS

#### STACKS

11/2019

Stacks is a full stack web application that was created by three other developers and myself. This application utilizes our skills in SWL, JSP, JSTL, and Spring. Based on user inputs, this application will keep track of users spending habits as well as savings goals. We help reach goals by outputting a timeline to visually show progress.

#### ADLISTER APPLICATION 10/2019

A full-stack web application utilizing Java servlets, JSP's, JSTL, and data access objects to allow users to CRUD ads from a MySQL database, My contributions included creating the update and delete functions in Java, implementing user ads onto their profile, intended redirects, and front end styling.

#### WEATHER MAP

08/2019

A fun, interactive application that gives a 3-day weather forecast based on the users inquiry. With the use of an API, I was able to asynchronously pull information from a database. This application allowed me to challenge my knowledge in jQuery, CSS, Ajax and Javascript.

### EDUCATION

#### CODEUP

12/2019

#### CERTIFICATE OF COMPLETION

A fully-immersive, project-based, and intensive 20 week full stack Java career accelerator that provides students with 600+ hours of expert instruction in software development.
