TECHNICAL SKILLS

HTML	Object Oriented Programming
CSS	Java EE
Javascript	Thymeleaf
Bootstrap	Paired Programming
jQuery	Spring Boot
MySQL	VCS with GIT
TDD	

PROFESSIONAL EXPERIENCE

NOBI PUBLIC HOUSE 2014-2019

Manager

Was responsible for opening and closing the store as well as interviewing and training new hires. Trusted to handle all employee scheduling as well as providing detailed reports on all financial transactions.

MASA SUSHI 2013-2015

Head Waiter

Was active manager on duty while General Manager was unavailable or on break. Responsibilities included training all new employees as well as assigning and enforcing duties to wait staff.

JIMMY JOHNS 2011-2013

Assistant Manager

Was in charge of nightly closing operations as well as maintaining all inventory. Also responsible for training all incoming staff as well as Managers from other stores.

DEVELOPMENT PROJECTS

ETPS FEB.2020

A collaboration with the Texas Workforce Commission and Codeup to create a portal that drastically improves the efficiency and ease of contact between the TWC and providers. By utilizing the Spring Boot framework with a MySQL database, we create the ability for providers to load previously sent data onto a submission form and remove the need to re-enter data that has not changed, while ensuring any changes can be easily made and sent to the TWC for verification and potential approval.

ADLISTER JAN.2020

A full stack application utilizing front and back end languages to create a fully functional Craigslist clone. Allows users to have full access to all CRUD functionality as well as working with an actual MySQL database to allow their information to be saved and updated.

PARTY EVENT PLANNER NOV. 2019

Developed an application with the ability to plan a dinner party. Through the use of the Spoonacular API, P.E.P. allowed a user to specify their needs and provided details on every aspect they would need to prepare a meal for guests, as well as pair wine based on their desired dish. My contributions created functionality and responsiveness through the API to provide the needed information.

WEATHER MAP OCT. 2019

An application used to handle asynchronous requests from two APIs to display detailed climate information about any location the user chooses.

EDUCATION BACKGROUND

CODEUP FEB. 2020

CERTIFICATE OF COMPLETION

A fully-immersive, project-based, and intensive 20 week full stack Java career accelerator that provides students with 670+hours of expert instruction in software development.
