

ROBERT RUTHERFORD

SOFTWARE DEVELOPER

Driven developer who enjoys using innovative software solutions to resolve complex problems. An avid learner who welcomes the opportunity to apply new skills and technologies. I am seeking a position where I can apply my formal and practical education to meet real world problems, and challenges.

PROFFESIONAL EXPERIENCE

Trilogy Pizza **2016-2019**

Cook

Handled multiple tasks including: Opened the restaurant (preparing the cooking area, setting up tables, etc.), reported inventory shortages, prepared ingredients (from cooking chicken, to creating dough), prepared and baked pizza and other menu items, and trained new employees.

DEVELOPMENT PROJECTS

ETPS website

ETPS Stands for Eligible Training Provider Systems. It is a 3-week project to create a website that allows for easier communication and submissions between the Texas Workforce Commission and education providers. My contribution to this website is the system for uploading and downloading of information from excel files to the MySQL database by using Apache POI.

Adlister Project

A 3-man group project to create a website that an individual can visit to view advertisements for educational lessons. Customers can register an account, which allows them to create and manage their own advertisements. The website incorporates the use of MySQL databases, JSP and JSTL pages, along with password encryption and user input protection.

D&D Character Sheet Page

A group project to create a web page that allows an individual to create a character for a tabletop game called Dungeons and Dragons (or D&D). I was the lead designer and also handled many of the background javascript objects and calculations.
