

COLIN MARCHBANKS

SOFTWARE DEVELOPER

I am a Software Developer equipped with knowledge of various programming languages and a passion to learn more and work hard. I am currently looking to branch off into a new field to work with technology, which has always been a passion of mine. I strive to be part of the technology that will shape the future.

TECHNICAL SKILLS

HTML	Java SE
CSS	MySQL
JavaScript	Spring Boot Framework
Bootstrap	jQuery
VCS and Git	Object Oriented Programming
Paired Programming	Java EE (Servlet, JSP)
Thymeleaf	TDD

OTHER SKILLS

Leadership skills that I used to steer my teams to complete various project. Cable installation, including telephone lines and CAT6.

PROFESSIONAL EXPERIENCE

EZ's Brick Oven and Grill **2017 to Present**

Team Member

Currently work at EZ's as a versatile member of the team. Usually shifting from front of house to back of house where I am needed. Learning quickly to be able to be placed where needed in the restaurant, and to be as useful as possible to the company and to my team.

Walker Technologies **2018 to 2019**

Cable Technician

Traveled around the state doing various installs for telephones, CAT6, cameras, and even briefly fiber. Taught me how to be a perfectionist with my work visually and that hard work builds character, as well as technical skills to allow me to better understand how the internet and networking works.

DEVELOPMENT PROJECTS

CONTAGION WATCH

02-2020

This is a web application designed to spread awareness about the growing outbreaks that the current population of the planet are facing now. This full-stack web application employs maps and a database to display information with real-time updates. This is my first application using Spring Boot Framework. It utilizes three APIs in order to get information, and to display the information in a visually appealing way to the user. This was a group project while I attended Codeup.

CARE PACKAGE

12-2019

This is a project that strikes deep in my heart, as the homeless community has always been something that I strive to help. This project allows a user to request a "Care-package" to their location, which contains various hygiene and health products, as well as a listed resource printout that shows them which agencies and associations nearby can get them the help they need. This project was the winner of the 2019 Veteran's Code-a-thon, hosted by Geekdom.

POLITICIAN LISTER

01-2020

This a group project I worked on while I was in Codeup focusing around using servlets to display multiple web-pages and to pull information from a MySQL database with select queries. This was a great way to practice writing CRUD functionality around a website designed to track politicians, the parties they belong to, and the countries in which these parties are located. Working in this group project taught me how to overcome adversity as well.

ACADEMIC PROFILE

Codeup | Full Stack Web Development **02-2020**

Certificate of Completion

A fully-immersive, project-based, and intensive 20 week full stack Java career accelerator that provides students with 670+ hours of expert instruction in software development.

Alamo Colleges

2018

Currently at 86 credit hours towards an Associates in Science

Learned valuable skills in the computer science field while I was in school, including Java and C++. As well as how to meet and maintain deadlines and how to set and reach goals.
