Receptionist

Answered all incoming calls, tended to walk-in customers, and efficiently maintained organization of sales records.

DEVELOPMENT PROJECTS

Full Stack Blog

Developed a full-stack Java based application with a MySql database, and Bootstrap framework design. Guest users can view posts or register in order to create a profile, submit posts, or view other users. This project is being built utilizing a collaborative and agile group environment, and is deployed through AWS integration.

React.js Tic-Tac-Toe

A tic tac toe game utilizing React.js that announce the users' turn, as well as the winner upon game over and disables further actions without selecting "play again".

PantryChef

A full-stack application that helps users find cooking recipes through a search input or category from an API. The site's main feature allows you to input your current pantry/fridge items and find a recipe based on those ingredients. Users can upload their own recipes as well, with full CRUD functionality.

Weather App

Created a weather application using JQuery and custom CSS. This application uses DarkSky API in conjunction with Mapbox API, giving the user the ability to view forecasts through the map pin or search feature. Appearance showcases modern design aspects that update accordingly with current weather.

Coffee Project

Built a JavaScript and CSS user interface to search or add coffees by name and roast. CSS grid styling provides dynamic accessibility through all media viewports.

EDUCATION

Codeup

Certificate of Completion

Fully-immersive, project-based, and intensive 20 week full stack Java career accelerator that provides students with 670+ hours of expert instruction in software development.
