VCS with Git	OOP
Paired	Java EE
Programming	
TDD	

DEVELOPMENT PROJECTS

Capstone Project

Apr 2020

Full Stack application that lets users find a workout partner in their area. SwoleMates utilizes languages such as HTML, BootStrap, CSS, Java, MySql Database, and Spring Security . Users can find matches based on a variety of customizable parameters including age, gender, location, desired exercise activities, fitness level, and schedule.

Adlister Project

Mar 2020

The Adlister project aims to replicate a buying and selling site much like Craigslist. It works on the concept of letting a user post their items for sale as ads so that other users can see them and respond. This project was created using JAVA for much of the backend functionality and MySQL for the database to store the user's information.

Simple Simon Project

Jan 2020

This project was made to make a simple color matching/ memory game, where a random color is chosen and the player(user) has to match the chosen colors to continue to the next stage as the difficulty ramps up. The code is written in Javascript, and utilizes both jQuery for the basic functionality and CSS for the styling of the page.

Weather Map Project

Jan 2020

This project was created to make a simple map that would utilize Dark Weather's API and Map-box's API to allow the user to look up the current and future weather of an area. The code is written in Javascript, and takes a bit of jQuery for the functionality as well as CSS for slight changes to the pages look.

PROFESSIONAL EXPERIENCE

Publix 2018 - 2019

Produce Associate

Was responsible for customer service, handled delicate items, as well as worked with and supported a team of co-workers at all times by assisting them in handling of product or helping them assist a customer.

Bistro C 2017 - 2018

Waiter

Worked independently and under pressure to complete tasks. Made sure orders were taken accurately from customers and handled a back-log of tasks to make sure everything was completed before closing each night.

ACADEMIC BACKGROUND

Codeup

4/2020

Certificate of Completion

A fully-immersive, project-based, and intensive 20 week full stack Java career accelerator that provides students with 670+ hours of expert instruction in software development.
