Paired	TDD
Programming	Java EE (Servlets, JSP)
ThymeLeaf	

Exposure to: Node.js, React.js, MongoDB, Shopify, WordPress, WebFlow, Express.js, Unity, C#

PROFESSIONAL EXPERIENCE

Codeup LLC 2021-Present Jr. Web Development Instructor

Help prepare entry-level students for entry-level jobs as computer programmers, web developers or software developers by instructing them to learn how to develop, design, deploy and manage their own web applications using MySQL, Java, JavaScript, jQuery and HTML/CSS. Instruction also includes teaching students how to successfully work in a collaborative team environment to be successful in technology careers.

Hoyack Agency 2020-2021 Junior Software Developer

Provide specification documents to clients to visualize the scope of various projects. To develop and build web features, full-stack web applications and deliver high quality products within the timeline given. Optimize existing web applications and features to ensure satisfactory performance and speed.

Parks and Recreation 2018-2020 Community Center Leader

Developed interpersonal skills establishing new relationships with outside organizations. Explored new avenues to communicate and collaborate with team members.

DEVELOPMENT PROJECTS

Adventure Buddy August/2020

A full-stack application built using Spring Boot, Thymeleaf, Java, JS, and CSS that connects people to the outdoors. By utilizing the HikingProject, Full Calendar, and MapBox APIs, users will have access to trail data which enables them to CRUD trails, as well as events to connect with others in their area.

(m)Adlister July/2020

A full stack Java application which utilizes the MVC design pattern, MySQL, and Bootstrap. Once registered, users can fully CRUD their own ads, as well as edit their user settings. Visitors can view and search for ads based on keywords that are in both the title and content of the ad. My contribution to the project includes the CRUD functionality for ads.

Movie Application June/2020

Paired programming project using ES6 Javascript, jQuery, NPM, Bootstrap/custom CSS, and HTML. A single page application that allows users to have complete CRUD functionality using a j-son server to mock the database and implement AJAX requests. I contributed to the project by creating the promises to fetch data for the create and update functionality of the application.

ACADEMIC BACKGROUND

Codeup September/2020

Certificate of Completion

A fully-immersive, project-based, and intensive 20 week full stack Java career accelerator that provides students with 670+ hours of expert instruction in software development.

University of Texas at Austin May/2016

Received a Bachelor's in Geography studying watersheds, landscape ecology and environmental science. Member of Texas Iron Spikes spirit organization.
