SUMMARY

Motivated full-stack software developer. Hard-working, a fast learner, and a good team-worker. Excited to code and be surrounded by software, and enjoys challenging myself. I have the ability to learn many different software languages, on top of the ones I already know, and am greatly interested in learning more and working within the software industry. Ready and eager to join a team and apply my skills towards technical projects.

PROJECTS

MUSIC MASTER

Full Stack web application that gives users the opportunity to play through various music related mini games and trivia games. This project involved using ThymeLeaf as well as front end languages such as JQuery and Bootstrap CSS. This project is a Java heavy project and utilizes Spring as well.

COFFEE PROJECT

JavaScript web application that allows users to navigate through the stock of a mock coffee shop. Users are able to add items, view prices, edit items, and delete items. For this project I also used CSS animations to create a more enjoyable user experience

ADLISTER

Full stack web application that allows users to browse through various ads. Users have search, edit, add, and delete functionality, as well as secure password protection, and password recovery.
