Works well individually as well as collaboratively with team members and groups from diverse backgrounds.

Development Projects

Weather Map - <https://github.com/brandontylerhall/weathermap>

The Weather Map is an application which allows users to search for a location and view a dynamic 5 day forecast of that location. Designed front-end capabilities which utilized the Mapbox API to show a map of the location the user has input. Utilized OpenWeatherMap API to receive the weather data that is then viewable to the user.

Environment: HTML, CSS, JavaScript, jQuery, MapBox API, OpenWeatherMap API, AJAX, Bootstrap 5

Movie Application - <https://github.com/wilson-hall/movie-project>

The Movie Application is an application which allows users to add, search, delete, and edit movie information to a database including name and rating. Designed front-end capabilities which utilized OMDb API to include visual posters of the movies which were entered. Implemented rating system for users to track preference of a specific movie.

Environment: HTML, CSS, JavaScript, jQuery, OMDb API, Bootstrap 5
