As a software developer with experience in designing, implementing, and maintaining software systems, I have successfully helped develop and deploy applications for the Air Force during my time in service as an Intelligence, Surveillance, and Reconnaissance Drone Operator. An effective team player with excellent communication and leadership experience. I am highly motivated and constantly seeking to improve my skills and knowledge in software development. I am confident in my ability to deliver high-quality solutions, and I am eager to contribute to the success of any organization.

Technical Skills

Photoshop - Powerpoint - HTML - CSS - Bootstrap - Tailwind - JavaScript - jQuery - React - Java SE - Java EE (Servlets, JSP) - Python - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

Development Projects

Classified Project - Military Drone UI:

Designed a user-friendly interface that allows users to easily view real-time data and analytics related to drone operations, such as flight paths & battery levels

Environment: Javascript/HTML/CSS/Java

- Successfully helped develop and implement a top-secret software program in Java, resulting in a cost savings of over \$75,000+ for the U.S Air Force
- Conducted thorough user research and usability testing, incorporating user feedback to continuously improve the platform's user experience.
- Collaborated with a team of developers and military personnel to design and execute the program, ensuring successful completion within budget and timeline

[BitMinerMart:](#)

As the Front-end UI/UX Developer, I contributed to the development of BitMinerMart, an ecommerce platform that focuses on the sale of Bitcoin miners. My primary responsibilities involved designing and implementing various technologies to create an intuitive and visually appealing interface for customers.

Environment: Spring Boot, Thymeleaf, Java, Bootstrap, Javascript, CSS, HTML

- Collaborated with two other developers to build an ecommerce store application from scratch, utilizing a variety of technologies.
- Conducted regular testing and debugging to ensure the application was running smoothly, while continuously optimizing for performance and efficiency.
- Provided training and support to team members on the technologies utilized in the project.

[Adlister:](#)

As a member of a three-person development team, I helped design and develop Adlister, an online platform similar to Craigslist that allows users to buy and sell items in their local area. We utilized a variety of technologies including Java, JSP, HTML, and CSS to create a seamless and user-friendly experience for users.

- Contributed to the development of the frontend features, including designing the user interface, creating dynamic web pages, and implementing custom search filters.
- Collaborated with the backend developer to ensure seamless integration of all features and smooth data management.

Work Experience

TronicsXChange - 6600 CA-27, Canoga Park, CA 91303

Sales/Store Manager | Oct 2016 - Jan 2019

- Led a high-performing team of 5 employees, providing training, coaching, and mentorship to foster a positive and productive work environment.
- Consistently exceeded sales goals year after year, resulting in increased revenue and profitability for the company.
- Developed and implemented sales strategies and initiatives to improve sales performance, resulting in a significant increase in sales and customer engagement.
- Conducted regular performance evaluations and provided constructive feedback to team members to improve their skills and maximize their potential.

Military - Department of Defense - United States Air Force - 25th Intelligence Squadron

Airborne Intelligence, Surveillance, & Reconnaissance Operator | Mar 2019 - Oct 2022

- Operated and monitored unmanned aerial vehicles (UAVs) to collect, analyze, and disseminate intelligence information in support of military operations.
- Conducted intelligence, surveillance, and reconnaissance (ISR) missions, using specialized equipment to gather and process data on enemy activities and potential threats.
- Demonstrated a strong sense of ethics and integrity, prioritizing the protection of sensitive information and the interests of those involved ensuring that government regulations and established protocols were safeguarded
- Communicated clearly and effectively with other members of a variety of teams, ensuring that instructions and information are understood and acted upon in order to achieve a successful mission
- Developed and executed training programs for the unit, ensuring that each member had the necessary skills and knowledge to perform their duties effectively.
- Acted as a liaison between the unit and higher command, providing regular updates and ensuring that objectives were met throughout multiple missions

Education

Community College of the Air Force

Associate's Degree - Intelligence Studies

2019-2022

Codeup

Certification of Completion

Oct 2022 - Mar 2023

A fully-immersive, project-based, and intensive 20-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development.
