 [GitHub/PaulSwann](https://github.com/PaulSwann)

Results-oriented software developer with a Bachelor's degree in Accounting and a passion for technology. Proven ability to leverage analytical and problem-solving skills to create innovative solutions. Proficient in customer service, budget management, and team coordination. Comfortable with a variety of technologies and eager to learn and grow as a software developer. Seeking a position where I can leverage my existing skills and experience to make a positive impact on a development team.

## Technical Skills

HTML - CSS - Bootstrap - JavaScript - jQuery - Java SE - Java EE (Servlets, JSP) - Spring - MySQL - Thymeleaf - Object-Oriented Programming - Test-Driven Development - Version Control with Git - Paired Programming

## Development Projects

### Project Name: [Aviato](#)

Aviato is a full-stack project that follows agile methodologies to provide flight booking and purchasing experience for its users allowing users to easily search, select, and purchase flights.. Application Features Include: Integration with flight APIs and data sources to ensure comprehensive coverage and accuracy of flight schedule information. The ability for users to view and manage current bookings, including details such as flight number, departure and arrival times, and booking status. Secure storage and protection of user data and payment information, in compliance with relevant data protection regulations.

**Environment:** HTML, CSS, JavaScript, Bootstrap, MySQL, Java, and Spring boot

### Project Name: [Movies API](#)

Designed and developed an web-based movie database utiizing paired. Utilized RESTful API calls to enable CRUD (create, read, update, delete) functionality for dynamically rendered elements, including the use of modals to allow users to delete, add, and edit movies.

**Environment:** HTML, CSS, JavaScript, jQuery, and Bootstrap

### Project Name: [Weather App](#)

As an individual project, designed and developed a weather forecasting web application. Integrated a map with a searchable location input and a movable pin to retrieve the 5-day forecast for any location using an AJAX fetch request. Utilized dynamically rendered elements to display weather information in a user-friendly format. Enhanced user experience with a responsive design and intuitive interface.

**Environment:** HTML, CSS, JavaScript, and Bootstrap

### Project Name: [Adlister](#)

A full-stack website that provides a platform for users to create and view classified ads for various items. It features user registration and login functionality with a dynamically changing navbar. A user dashboard is created to manage ads and profile information, including the ability to create, view, update, and delete ads and profile information. Additionally, search functionality is implemented to allow users to search for ads based on keywords and categories.

**Environment:** HTML, CSS, JavaScript, jQuery, Bootstrap, MySQL, and Java

## Military Experience

**United States Army** | Fort Stewart, Georgia

*Airfield Operations Coordinator* | Sep 2015 – Jan 2017

- Supervised and led a team of 12 personnel through a federal Aviation Resource Management Survey (ARMS) operational audit and achieved a satisfactory pass rate of 90%.
- Organized aircraft clearances, security brief, and air tasking orders; managed crew schedules, operational calendars, and coordinated logistics.
- Constructed ad-hoc reports with the use of Excel's Pivot Tables/V-Look Up/Macros as a means for management to accurately evaluate the overall performance and training requirements of employees.

**United States Army** | Seongnam, S. Korea

*Human Resource Assistant/Receptionist* | Apr 2013 – Sep 2015

- Created and reviewed memorandums, employee attendance, as well as administrative request packets pertaining to organizational awards, promotion, leave, and intra-organizational transfers.
- Assisted in the coordination of orientations of all incoming qualified employees by volunteering beyond assigned responsibilities to participate as a company sponsor.
- Scheduled appointments and maintained calendars, arranged conference rooms and facilities for meetings.

## Professional Experience

**LSG Sky Chefs** | Irving, Texas

*Customer Service Representative* | Jan 2022 – Sept 2022

- Utilized cloud-based collaboration software to communicate and coordinate with cross-functional teams across multiple locations, improving communication and reducing turnaround times for client orders.
- Acted as a mediator between clients and internal teams, effectively resolving conflicts and promoting a positive working relationship between the two parties.

**Mesilla Valley Transportation** | El Paso, Texas

*Transportation Specialist* | Nov 2020 – Jul 2021

- Assisted in maintaining and updating transportation documentation to ensure compliance with regulations and standards.
- Utilized strong organizational and time management skills to plan and coordinate logistics, resulting in efficient and timely deliveries.

**Queens College: Veteran Support Services** | Flushing, New York

*Veteran Affairs Work Study | Administrative Assistant* | Jan 2019 – Dec 2019

- Developed and maintained an online database of resources and information for veteran students, using IT tools to organize and streamline information for easy access.
- Managed a budget of \$2,500 designated for veteran-related functions, utilizing Excel to track expenses, perform analytics, and present financial reports to management.
- Utilized Google Forms to collect and analyze data from student surveys, performing various analytical procedures to identify patterns and trends in student feedback.

## Education
