### Technical Skills

HTML, CSS, Bootstrap, JavaScript, jQuery, Java SE, Java EE (Servlets, JSP), Spring, Thymeleaf, MySQL, Object-Oriented Programming, Test-Driven Development, Version Control with Git, Paired Programming, Project Management

### Soft Skills

Mentoring, Organized, Multi-tasking, Leadership, Problem-solving skills, Collaboration, Process Improvements

Exposure to: Agile Methodology, user stories

### Education

#### Codeup

Certification of Completion

Oct 2022 - Mar 2023

A fully-immersive, project-based, and intensive 20-week Full-Stack Java Career Accelerator that provides students with 670 hours of expert instruction in software development

As a detail-oriented and motivated Software Developer and Army Veteran, I possess a unique blend of problem-solving and critical thinking abilities.

A team-oriented individual with a proactive mindset and a strong passion for utilizing cutting-edge information systems, I am eager to contribute my expertise to an organization where I can continue to develop my skills while working on a diverse array of exciting projects and applications. I am confident in my ability to excel in any technical role and am committed to making a meaningful impact in the industry.

### Development Projects

#### [Death By Coffee](#)

The Death By Coffee Website is an intuitive and visually appealing single-page web design I created to showcase various types of coffee. The website's core functionality is to feature different types of coffee, including their roast level, providing users with the ability to filter the coffee listings based on the desired roast level and search for a specific type of coffee by its name. Additionally, the website provides a feature to add a new type of coffee to the listings. This website was designed to showcase my proficiency in using HTML, CSS, Bootstrap and implementing basic functionality using JavaScript. The ultimate goal of this project was to demonstrate my ability to utilize these technologies and create an interactive user experience.

#### [The WAPP](#)

I developed a weather forecast application that enables users to search for a location and view the corresponding current weather forecast. The application also features an interactive map that displays the searched location, allowing for panning and zooming capabilities. My specific role in this project was the creation of all code, including the integration of the Mapbox and OpenWeatherMap APIs for location and weather data retrieval, development of the HTML layout and elements, and styling via CSS with an emphasis on responsiveness. The final outcome of this project is a user-friendly platform that facilitates the seamless search and view of current weather forecasts and exploration of locations via an interactive map. The project was developed utilizing a combination of technologies such as JavaScript, jQuery, HTML, CSS, and APIs for Mapbox and OpenWeatherMap.

#### [Movie Website](#)

I developed a web-based software application that enables users to access and manage a comprehensive movie database. Utilizing HTML, CSS, and JavaScript, I designed and implemented the front-end interface which facilitated the ability for users to view a list of movies, perform targeted searches, add new entries to the database, and delete existing records. Utilizing jQuery and Fetch API, I integrated HTTP requests to a Glitch server and an external OMDb API to provide seamless data manipulation capabilities. Additionally, I applied CSS to optimize the layout and design of the application. The culmination of these efforts resulted in a highly functional application that empowers users to effectively manage and access a vast movie database. The project was developed using HTML, CSS, JavaScript, jQuery, Fetch API, Glitch, OMDb API.

## **Military Experience**

**U.S. Army** - Dallas, TX

*92M Support Operation Staff / Oct 2018 - Current*

- Supervised and led a team of soldiers, responsible for their training, welfare, morale, professional development, quality of life, and combat readiness
- Managed the maintenance of various weapons, heavy-duty vehicles, and equipment, and strategically deployed them during missions and patrols
- Currently in the role of Support Operations, supporting logistical planning efforts for unified land operations and potential mass fatality incidents, while overseeing all training and readiness in Contingency Fatality Operations during Operation Inherent Resolve 2022
- Extensively trained and proficient in driving in various terrains and weather conditions under prolonged and high-stress environments, successfully navigated cross-country in various types of tactical vehicles, including 2-3 Axles
- Experience in Petroleum Supply Operations, supporting maneuver unit competition operations center to improve organizational readiness and training
- Identified and specified necessary levels of petroleum inventory to support operating stock requirements, prepositioned war reserve requirements, and specified amount of petroleum product needed by location

*Armed Forces Medical Examiners Services Support | 2019-2020*

- Demonstrated exceptional leadership, collaboration, and teamwork abilities as a key member of the Armed Forces Medical Examiner Services Support from 2019-2020
- -Tasks such as collecting and analyzing DNA samples, coordinating with other agencies to assist with identification efforts, and assisting medical examiners with conducting autopsies to identify and confirm the cause of death of service members both in the US and overseas
- Demonstrated willingness to serve and assist during times of crisis, deploying to aid the city of New York during the Covid-19 pandemic from March-June 2020
- Developed adaptability and quick decision-making skills during these experiences.

## **Professional Experience**

**CVS Pharmacy** - Dallas, TX

*Product Manager / July 2016 - June 2018*

- Provided goods and services while conducting transactions between customers and vendors.
- Logistically planned all inventory within the store, stocking and maintaining product for future purchase.
- Assisted customers with issues and complaints all while preventing potential fraud and theft.
