Marine Corps Veteran and Security Professional with TS/SCI security clearance and over thirteen years of combined work experience. An adaptable leader with exceptional problem-solving and decision-making skills. Recent graduate of a Cybersecurity immersive course seeking a position to utilize obtained skills and abilities to achieve professional growth while being resourceful, innovative, and a valuable asset to the organization. Exposure to Spanish and French

TECHNICAL SKILLS

HTML - CSS - Bootstrap - JavaScript - ES6 - jQuery - Ajax - JSON - RESTful API - REST API - Maven - Java SE - Java EE (Servlets, JSP, J2EE) - File I/O - MVC - Spring Boot - Hibernate - MySQL - Thymeleaf - Object-Oriented Programming (OOP) - Test-Driven Development (TDD) - Version Control with Git - Paired Programming - Agile Methodologies - Debugging - AWS Deployment - Apache TomCat - Unit Testing (JUnit) - MS Office

Exposure to: Agile Management Tools - KanBan for Workflow - Project Management Tools - Github Pages - NPM - Scrum Stand Up - Documentation - Spring Framework - Python - Linux

SOFT SKILLS

Collaborative - Peer Review - Innovative - Strong Communication Skills - Teamwork - Builds Relationships - Initiative - Analytical - Flexibility - Reliable - Integrity - Work Independently - Visualization - Virtualization- Willingness to Learn - Collaborate - Problem Solving Skills - Research Skills - Dedicated - Competitive - Self-motivated - Committed - Team Player - Innovative - Independent - Written and Oral Communication Skills - Culture - Fast Paced - Troubleshooting - Leadership - Wireless Networks - Customer Advocacy - Budgeting - Business Analytics - Project Management - Critical Thinking - Bash//Shell Scripting - Vulnerability Assessment - Lean Sigma Six (Green Belt)

DEVELOPMENT PROJECTS

BrewQuest: [Live Site](#) | [Repository](#)

Worked collaboratively with a group of developers to design, plan, build, and deploy a mobile-responsive full-stack web application. After finalizing a project proposal, we created user stories and developed feature lists, wireframes, storyboards, database diagrams, and a project management board. Through morning stand-ups and afternoon demos, we leveraged an Agile workflow to execute the full development lifecycle through deployment to AWS. [If applicable: Additionally, integrated XYZ APIs for enhanced user functionality.]

Skills: Paired Programming, HTML, CSS, Bootstrap, Java, JavaScript, Spring Boot, Spring Boot Security, API.

Adlister Project [Repository](#)

A simplified version of Craigslist that allows users to post and browse advertisements. The project provides a functional and user-friendly platform for posting and browsing advertisements, while also providing me with experience in web development, database management, and software testing.

Skills: Paired programming, HTML, CSS, JavaScript, Spring, MySQL, and jQuery.

Weather Map Project: [Repository](#)

A weather application that gives the forecast for locations around the world. The application is designed with a clean and intuitive interface that allows users to quickly and easily access the information they need. The application makes use of the latest weather data to provide hourly and daily forecasts for a variety of metrics, including temperature, precipitation, wind speed, and humidity.

Skills: HTML, CSS, jQuery, AJAX, and OpenWeatherMap API

Movie Project: [Repository](#)

Designed and developed a web-based movie database. Utilized RESTful API calls to enable CRUD (create, read, update, delete) functionality for dynamically rendered elements, including the use of modals to allow users to delete, add, and edit movies. Users can select individual checkboxes to delete multiple movies at once and edit movie details by title and year.

Skills: Paired programming, JavaScript, HTML, CSS, jQuery, OMDb API

MILITARY EXPERIENCE - TS/SCI security clearance

United States Marine Corps MWSS 472 - Lakehurst, NJ
Unit Training Chief/Expeditionary Airfield Officer

Mar 2017 - Nov 2019

- Supported management by counseling, training, and educating team members about meeting project deadlines. Ensured clear communications with personnel to effectively coordinate training schedules and performed all administrative functions for the organization as Unit Training Chief.
- Maintained accountability for over \$2,000,000 worth of issued equipment which consisted of vehicles, weapons, sensitive items, communication and office equipment with zero percent loss or damage during redeployment in a high-pressure environment.
- Managed company maintenance budgets, by analyzing costs and revenue that helped predict annual spending for the next five years.
Support bi-annual Evidence Based Control Evaluation testing activities and provide liaison support for all evolutions of testing and training.
- Advised managers on organizational policy matters, such as equal opportunity and sexual harassment, and recommend needed changes to policies.
- Led 200+ Marines in multi-level training operations by simulating fast-paced and high-stress scenarios for JSOC real-world air ground training missions.

United States Marine Corps MWSS 373 - Miramar, CA
Production Control Chief and Operations Manager

Feb 2012 - Mar 2017

- Trained senior-level management with critical thinking skills that was necessary to act independently as assistant to their department directors. Educated staff how to defuse hostile situations with superior negotiation techniques and complexities of communication in extreme climates.
- Supervised staff operations and provided expert administrative support to key leaders and professional staff for a organization ranging from training, administrative management, transportation, and logistics
- Operated a portable and tactical airfield to include maintenance of ground support equipment for aircraft. Conducted airport operations, maintenance, safety and general security functions and performed daily self-inspections of airport facility conditions to ensure safe, efficient airport operations.
- Serve as a link between management and employees by handling questions, interpreting, and administering contracts and helping resolve work-related problems.
Conducted emergency contingency plans and delegated personnel in maintenance actions and hundreds of time-sensitive inspections annually.
- Provided civilians and government channels clear and concise training on deployment of communications equipment in preparation for natural disaster scenarios, and preventative cybersecurity training Social Engineering Toolkits
- Cross-trained team members to analyze configuration baselines to improve maintenance, to diagnose faults, and ensure emergency and security functions are compatible with local, state, and federal regulations.

PROFESSIONAL EXPERIENCE

Divergence Academy - Addison, TX
Cybersecurity Professional Penetration Tester Student

Jul 2021 - Sep 2021

- Linux Operations, files & permissions; Bash/Shell Scripting commands, LS, CP, echo, NANO, CHMOD, etc
Managed Network Operations: software, hardware, routers (wireless), switches, & CAT 6 (cut/splice/crimp).
- Responsible for public-key infrastructure, transport encryption, securing applications (virtual & cloud), access control.
- Verified Service and Application Configuration
- Configured port security and secure access channels.
- Secured network infrastructure by managing access controls in Linux and Windows Servers

Allied Universal - Undisclosed, TX
Physical and Facility Security Professional

Sep 2020 - May 2021

- Responsible for all aspects of SCI security management, security planning, personal security, physical security, program access request coordination, coordinating secure communications, and inspections of scir areas
Consulted clients about improving business practices, by conducting surveys to help improve the work environment.
- Knowledge of DoD 5105.21 all volumes and other DoD manuals, and SAP related manuals
- Participated in regular in-service training to ensure the company remained in compliance with government compliance.
- Investigate Security Incidents/Violations to include documenting initial inquires and final reports

- Ensure compliance with NISPOM and all security protocols required by customers or contracts and keep abreast of ever-changing industrial security regulations.

EDUCATION

Codeup

Certification of Completion

Feb 2023 - Jul 2023

This 5-month coding boot camp teaches full-stack software development through 670 contact hours of hands-on technical training (20% more time than 4-year degree majors require). Students hone skills in modern web technologies, computer science, software engineering, and application architecture while gaining project experience with pair programming, debugging, troubleshooting, agile project management, user stories, feature lists, UI/UX, wireframing, and relational database design.
