PROFESSIONAL HIGHLIGHTS

Front-End Developer (Contract) | Elevate Systems

May 2023 - Present

- Actively participated in Agile development, attending daily standups and contributing valuable insights to team discussions.
- Collaborated closely with design and project management teams to integrate color themes and visual elements, ensuring a seamless user experience.
- Demonstrated strong problem-solving skills, effectively troubleshooting and resolving front-end challenges to ensure smooth application functionality.
- Developed responsive and interactive user interfaces using modern front-end technologies, including HAML, SCSS, JavaScript, and some Ruby on Rails.

Senior Stylist | Stitch Fix

Dec 2020 - Aug 2022

- Reviewed over 100 client profiles and preferences per day in order to provide customized and fashionable recommendations to loyal customers
- Developed and applied basic knowledge and procedures to complete assigned projects and tasks daily while leading with client obsession
- Followed established procedures to complete assignments while developing skills in identifying and implementing resources to increase efficiency and ensure the highest quality work

DEVELOPMENT PROJECTS

[Artzip](#) | [Website](#)

Ruby on Rails, HAML, SCSS, Javascript, Bootstrap

Artzip is a service for capturing and stitching photos into a single high-res image. End users can capture a small number of photos on their own using only a tripod. I directly contributed to enhancing the user experience and interface. I improved the functionality and design of the application's navigation by updating the UI Checkout View, implementing the Pop-Out Navbar, Rectification Magnifier Reticle, and developing the Theme Preview View.

[Wedding Wise](#)

Java, Spring Boot: Security and Data, MySQL, jQuery, Thymeleaf

Wedding Wise is a wedding planning application that allows two different kinds of users access while providing features to a customer like budget tracking, an idea board, a guest list manager, a vendor directory, vendor ratings, and email service integration. Designed, styled, and implemented front-end functionality and aesthetic. Implemented dynamic pages through java controllers and thymeleaf. Created and implemented custom error pages.

[AdLister](#)

Java EE(Servlets, JSP), HTML, CSS, Bootstrap, Javascript

AdLister is an application that allows users to search through ads by title or category, delete and edit an ad through their profile, along with registering a new user and creating new ads. Implemented front and back-end user validation. Created and implemented ad categories functionality through Java servlets and jsp files. Styled the application

EDUCATION

Codeup

Nov 2022 - May 2023

This 5-month coding boot camp offers hands-on technical training in full-stack software development with 670 contact hours, including modern web technologies, computer science, software engineering, and application architecture. Gain project experience in pair programming, debugging, agile project management, UI/UX, wireframing, and relational database design.

University of North Texas

Aug 2017 - Dec 2019

Completed two and a half years of undergraduate with a focus in classical vocal performance.
